Sabine is open to helping me learn a new and different therapeutic styles/models and techniques rather than focusing on only one model.					
Sabine provides me with feedback on administrative tasks as required, including progress notes, treatment plans and assessments, etc.					
I have felt supported by Sabine even when I have disagreed with some suggestions made by her regarding my treatment / approach with specific clients.					
I believe some of Sabine's actions in one or more situations were unethical or illegal .					
Sabine has provided me with little to no helpful feedback & I feel this was a waste of time.
